

URGENT NOTICE

Stage 2

Thanks to your efforts we are still in stage 2 of the curtailment plan. We have not made as much headway as we were hoping. **We would like to thank you all who made this possible.** However, there is still a significant risk of water shortfalls if we do not continue our conservation efforts.

We have been in contact a water hauling company to help compensate for the water shortage and water supply in the holding tanks, if the need arises again.

We should be drilling a new well within the next two weeks, we have received our notice of intent to drill new wells. **We need your help! We are still asking for all customers to reduce their water demand by cutting back resources and conserving as much as possible.** Until a secondary supply can be established the following guidelines have been implemented.

- Be conscious of unnecessary water running.
- Ensure there are no water/irrigation leaks on your property.
- Take full advantage of monsoon rainfall rather than using automated irrigation. Turn irrigation control clocks off.
- Washing vehicles, misting systems, filling pools, spas, fountains is highly discouraged.

Together we can get through this crisis. Know that we are working diligently on our efforts. We ask of you the same.

Once again we would like to thank you for your continued efforts to conserve and get all of us through this difficult time.
