

## URGENT NOTICE

On Monday, 9/2/2024, we experienced an emergency at our main water storage facility, which in turn resulted in a temporary water outage. There is a significant risk of water shortfalls.

We have made several attempts to contact water hauling companies to help compensate for the water outage and water supply in the holding tanks.

We are currently looking to add a secondary source of water supply, but this process will require some time. **We need your help! We are asking for all customers to reduce their water demand by cutting back resources and conserving as much as possible. THIS IS MANDATORY.** Until a secondary supply can be established the following guidelines have been implemented.

- Be conscious of unnecessary water running.
- Ensure there are no water/irrigation leaks on your property.
- Take full advantage of monsoon rainfall rather than using automated irrigation. Turn irrigation control clocks off.
- Washing vehicles, misting systems, filling pools, spas, fountains is prohibited.
- Additional service lines and meter installations will be prohibited.
- Any other water intensive activity is prohibited.

Together we can get through this crisis. Know that we are working diligently on our efforts. We ask of you the same.

(Granite Mountain Water Company reserves the right to temporarily discontinue water service to patrons who fail to comply with the mandatory requirements.)
